

Oncology CAP Undesignated protocols

At times a physician may request CAP approval to use 2 BCCA protocols to create a new protocol. After receiving authorization to combine the protocols you are ready to place the Chemotherapy orders using the **ONC BC Cancer CAP Undesignated** Regimen template.

1. From the Orders profile search click on the add new order + Add | icon.

- 2. Type "**ONC BC**" to search for the "**ONC BC Cancer CAP Undesignated**" Regimen ¹. Click on the Regimen once to select and add this Regimen to the patient's order profile.
- 3. Choose an Est start date for the plan and click OK. Click Done to close the Add Order window.

10. You will need to manually add the Chemotherapy drugs to phase. Click on the **Add to Phase** button and select Add Order. Search for the drug and ensure the drug form lists Oncology.

11. Choose which days you wish to add the drug to. Review and apply the dosing calculations as needed. NOTE: The timing offsets of the medications to time zero will not be set by adding the drugs to phase. The Nurse will need to manually reschedule the medications on the eMAR to be reflected correctly.

Click Orders for Signature, Sign, refresh orders. **NOTE:** When the Chemotherapy drugs are manually added to phase the time offset to time zero will not be reflected correctly in the MAR.

The Nurse would have to manually reschedule the drug in this instance to ensure the administration time is reflected correctly in the eMAR.
